

Project Executable Files

Date	29 September 2026
Team ID	SWTID-2026-4636
Project Name	AI BLOGNEST API
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Submitted
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide	Yes
3	package.json dependency file	Yes
4	MongoDB database schema / models	Yes
5	.env.example / Environment configuration	Yes
6	Deployed application URL	NA – Local Project
7	APK / Executable binary	NA
8	Dockerfile / Containerization config	NA
9	Postman API test files and results	Yes

Step 2: File / Folder Structure

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	NA – Running locally
Login Credentials (Demo)	Register and login using Postman
Platform / Hosting Provider	Local / VS Code
Repository Link	https://github.com/tejasarathy10/AI-Blog-Nest-API
Demo Video Link	https://drive.google.com/file/d/1rksl-vsK-Ozr257vg4ciTfbTPimqRUAr/view?usp=drive_link

Step 4: Run Instructions

Pre-requisites:

- Node.js v24 or compatible version
- npm
- Visual Studio Code
- MongoDB Atlas account and connection string
- Postman for API testing
- Gemini API key for AI features

Step 1:

Clone the repository: `gh repo clone tejasarathy10/AI-Blog-Nest-API`

Step 2:

Open the project folder in VS Code and install dependencies: `npm install`

Step 3:

Configure the environment by creating a `.env` file:

`PORT=5000`

`MONGO_URI=your_mongodb_connection_string`

`JWT_SECRET=your_jwt_secret`

`GEMINI_API_KEY=your_gemini_api_key`

`GEMINI_MODEL=gemini-2.5-flash`

Step 4:

Connect the project to MongoDB Atlas using the MONGO_URI configured in the .env file.

Step 5:

Start the application: `npm start`

For development mode: `npm run dev`

Step 6:

Open the API in the browser: <http://localhost:5000>

6. Test APIs using Postman

Test the following modules:

- User Registration
- User Login
- Create Blog
- Fetch Blogs
- AI Blog Generation
- AI Blog Summarization

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	AI generation depends on the Gemini API	Requires a valid Gemini API key
2	MongoDB connection requires internet access	Use a valid MongoDB Atlas connection
3	API runs locally	Start the Node.js server before testing
