

Scalability & Future Plan

Date	29 September 2026
Team ID	SWTID-2026-4636
Project Name	AI Blog Nest API
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S. No	Limitation	Impact	Priority to Address
1	Limited AI-generated content features	Users may need to manually create and edit blog content	High
2	Limited scalability for large numbers of users	Performance may decrease when user traffic increases	Medium
3	Basic security and authentication	Requires stronger protection for user accounts and API access	High

Scalability Plan:

S. No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports a limited number of users	Use cloud deployment and load balancing for more users
2	Data Storage	MongoDB database	Use scalable cloud database and optimized indexing

3	Performance	Suitable for normal API requests	Add caching and optimize database queries
4	Security	Basic authentication using JWT	Add stronger authentication, validation and API security

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	AI-powered blog generation and summarization	1–2 Months	Faster and easier content creation
Phase 2	User dashboard and blog management	2–3 Months	Better user experience and content management
Phase 3	Cloud deployment and performance optimization	3–4 Months	Improved scalability and accessibility
Phase 4	Advanced AI features and enhanced security	4–6 Months	More intelligent features and improved API security
