

NO. OF FUNCTIONAL FEATURES INCLUDED IN THE SOLUTION

Date	29 September 2026
Team ID	SWTID-2026-4636
Project Name	AI BlogNest API
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Functional Features Overview

This document lists the functional features included in the AI BlogNest API solution. Each feature is described by its purpose, implementation status, module/component, marks, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status	Marks	Contribution
1	User Registration & Login	Allows users to create an account and securely log in to the blogging system.	User Management / Authentication	Done	0.5	Provides secure user access and account management.
2	JWT Authentication & Protected APIs	Protects authorized API endpoints using JSON Web Tokens.	Security / Authentication	Done	0.5	Ensures only authenticated users can access protected operations.
3	Blog CRUD Operations	Users can create, view, update, and delete their blog posts.	Blog Management	Done	0.5	Provides the core functionality for managing blog content.
4	AI Blog Ideas & Content Generation	Assists users in generating blog ideas and AI-supported content.	AI Content Module	Done	0.5	Reduces manual effort and supports faster content creation.
5	Content Summarization & Improvement	Supports summarizing and improving blog content for clearer presentation.	AI Content Module	Done	0.5	Helps users refine and improve existing blog content.
6	Categories & Tags	Allows blog posts to be organized using categories and tags.	Content Organization	Done	0.5	Makes blog content easier to classify and manage.
7	Search Functionality	Allows users to find relevant blog posts using search.	Search Module / API	Done	0.5	Improves accessibility and management of multiple posts.
8	Database & API Integration	Stores user and blog data in MongoDB and exposes REST API endpoints.	Database / REST API	Done	1.0	Provides persistent data storage and integration for the application.

Feature Summary

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	6
Additional / Nice-to-Have Features	2
Features Tested & Verified	8

Feature Category Breakdown

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	API-facing application interaction / client requests	Registration, login, blog operations
2	Backend / Logic	Node.js and Express.js application logic	Blog CRUD, AI processing, search
3	Database / Storage	MongoDB with Mongoose for persistent data	Users, blogs, categories, tags
4	API / Integration	RESTful API endpoints for application features	Authentication, blog, AI and search APIs
5	Security / Authentication	JWT-based access control and password protection	Login, protected routes, bcrypt password hashing
